

Day 1: Introduction to Game Development

Classwork - Team Formation (20 minutes)

- Welcome students and introduce the Game Development Project.
- Explain that today, students will form teams and choose a game concept category.
- Have students count off and form teams.
- Provide a list of game concept categories, and each team chooses one.
- Each team should write down their chosen category.

Team Brainstorming (25 minutes)

- In their teams, students start brainstorming ideas for their game concepts within their chosen category.
- Encourage creativity and free thinking.
- Ask each team to appoint a scribe to note down ideas.

Classwork - Game Concept Development (20 minutes)

- In their teams, students work together to create a basic game concept, outlining the game's core idea, genre, and target audience.
- Emphasize that they don't need to worry about details at this stage; the goal is to capture the essence of the game.
- Teams should appoint roles (e.g., game designer, artist, writer) to distribute responsibilities.

Homework Assignment (10 minutes)

- Assign homework for students to reflect on today's lesson and contribute to their team's game concept development.
- Remind them to think about how they can enhance the idea and what role they might be interested in within their team.

Day 2: Game Mechanics and Player Engagement

Lecture - Game Mechanics (15 minutes)

- Begin with a brief recap of Day 1 and team assignments.
- Introduce the concept of game mechanics: rules and systems that make a game work.
- Provide examples of common game mechanics (e.g., scoring systems, puzzles).
- Emphasize the role of game designers in shaping these mechanics.

Classwork - Game Mechanics Brainstorming (25 minutes)

- In teams, students brainstorm and discuss potential game mechanics that align with their game concept.
- Encourage teams to think about how these mechanics will engage players and enhance the gaming experience.

Classwork - Player Engagement Discussion (15 minutes)

- Teams discuss how their chosen game mechanics will engage players and enhance the overall gaming experience.
- Emphasize the importance of keeping players interested and entertained.

Homework Assignment (10 minutes)

- Assign homework for students to reflect on today's lesson and contribute to their team's game concept refinement.
- Encourage them to think about how they can further enhance player engagement through game mechanics.

Day 3: Visuals and Game Concept Development

Lecture - Role Spotlight - Artist (15 minutes)

- Begin with a brief recap of Day 2 and team progress.
- Spotlight the role of artists in the early stages of game development.
- Explain their responsibility for creating visual representations that capture the game's aesthetics.

Lecture - Visual Styles (15 minutes)

- Discuss the importance of visual style in games and how it impacts player perception and engagement.
- Mention that games can have various visual styles (e.g., realistic, cartoonish).

Classwork - Visual Styles Discussion (20 minutes)

- In teams, students discuss the visual styles they envision for their game concepts.
- Encourage them to share their thoughts and inspirations with each other.

Classwork - Role Collaboration Activity (20 minutes)

- Teams discuss how their artists can collaborate with other team members (e.g., designers, programmers, writers) to ensure visuals align with the game's vision.

Homework Assignment (10 minutes)

- Assign homework for students to reflect on today's lesson and prepare their team's pitch for the following day.
- Remind them to think about how they can clearly present their game concept's visual style and overall vision.

Day 4: Character and World-Building with AI

Lecture - AI in Game Development (15 minutes)

- Introduce the concept of Artificial Intelligence (AI) in game development.
- Explain how AI can be used to automate character and world-building processes, saving time and adding creative possibilities.

Classwork - AI Character Generation (20 minutes)

- Provide students with access to AI-driven character generation tools (if available).
- In teams, have students use these tools to create characters for their game concepts.
- Emphasize the importance of customizing characters to fit their game's themes and aesthetics.

Classwork - AI World-Building (20 minutes)

- Introduce AI-driven world-building tools (if available) that can generate landscapes, environments, or level designs.
- In teams, students use these tools to create elements of their game world, such as environments or levels.
- Encourage students to adapt AI-generated content to align with their game's narrative and style.

Homework Assignment (10 minutes)

- Assign homework for students to continue refining their game concepts with the AI-generated characters and world elements.
- Encourage them to think about how these elements enhance their game's storytelling and player engagement.

Day 5: Game Concept Pitches

Game Concept Pitches (40 minutes)

- Each team presents their refined game concept, including the characters and world elements generated with AI.
- Limit each presentation to a set time (e.g., 5 minutes) to ensure all teams have a chance to pitch.
- Encourage peer feedback and questions after each pitch.

Conclusion (8 minutes)

- Wrap up the project by congratulating students on their hard work, creativity, and the use of AI in character and world-building.
- Discuss the potential of AI in the future of game development.

Homework Assignment (7 minutes)

- Assign homework for students to reflect on the entire project, the use of AI, and what they've learned about game development concepts, team collaboration, and technology integration.

SLIDES

Day 1: Introduction to Game Development

Slide 1: Title

- Title: Introduction to Game Development

Slide 2: Introduction

- Introduction: Welcome to our Game Development Project! Over the next three days, we'll explore the exciting world of game development, understand the roles within a game development team, and create our own game concepts.

Slide 3: What is Game Development?

- What is Game Development?: Game development is the process of creating video games. It involves various roles, skills, and teamwork to bring games to life.

Slide 4: Game Development Team Roles

- Game Development Team Roles: Game development teams consist of various roles, such as game designers, artists, programmers, writers, sound designers, and more.

Slide 5: Game Design

- Game Design: Game designers are responsible for crafting the game's rules, mechanics, and overall player experience.

Slide 6: Art and Visuals

- Art and Visuals: Artists create the visual elements of a game, including characters, environments, and user interfaces.

Slide 7: Programming

- Programming: Programmers write the code that makes the game run smoothly and interactively.

Slide 8: Story and Writing

- Story and Writing: Writers develop the game's narrative, dialogues, and story elements.

Slide 9: Sound and Audio

- Sound and Audio: Sound designers create the audio elements, such as music and sound effects, that enhance the gaming experience.

Slide 10: Role Spotlight - Game Designer

- Role Spotlight - Game Designer: Dive deeper into the role of a game designer, exploring their responsibilities and skills.

Slide 11: Classwork - Team Formation

- Classwork - Team Formation: Students form teams, and each team chooses a game concept category they're interested in exploring.

Slide 12: Team Brainstorming

- Team Brainstorming: In teams, students begin brainstorming ideas for their game concepts within their chosen category.

Slide 13: Classwork - Game Concept Development

- Classwork - Game Concept Development: Teams work together to create a basic game concept, outlining the game's core idea, genre, and target audience.

Slide 14: Conclusion

- Conclusion: Great job on Day 1! Tomorrow, we'll delve into game mechanics and start refining our game concepts.

Slide 15: Homework Assignment

- Homework Assignment: Reflect on today's lesson and contribute to your team's game concept development. Think about how you can enhance the idea and what role you might be interested in within your team.

Day 2: Game Mechanics and Player Engagement

Slide 1: Title

- Title: Game Mechanics and Player Engagement

Slide 2: Introduction

- Introduction: Welcome back to Day 2 of our Game Development Project! Today, we'll explore game mechanics and how they engage players in exciting ways.

Slide 3: Game Mechanics Defined

- Game Mechanics Defined: Game mechanics are the rules and systems that make a game work. They define how players interact with the game world.

Slide 4: Player Engagement

- Player Engagement: Engaging players is crucial for a game's success. Game mechanics play a significant role in keeping players interested and entertained.

Slide 5: Role Spotlight - Game Designer (Continued)

- Role Spotlight - Game Designer (Continued): Further explore the role of a game designer, focusing on their role in shaping game mechanics.

Slide 6: Game Mechanics Examples

- Game Mechanics Examples: Explore examples of common game mechanics, such as scoring systems, puzzles, and character progression.

Slide 7: Classwork - Game Mechanics Brainstorming

- Classwork - Game Mechanics Brainstorming: In teams, students brainstorm and discuss potential game mechanics that align with their game concept.

Slide 8: Classwork - Player Engagement Discussion

- Classwork - Player Engagement Discussion: Teams discuss how their chosen game mechanics will engage players and enhance the overall gaming experience.

Slide 9: Classwork - Game Concept Refinement

- Classwork - Game Concept Refinement: Teams refine their game concepts, incorporating the discussed game mechanics and focusing on player engagement.

Slide 10: Conclusion

- Conclusion: Fantastic work on Day 2! Tomorrow, we'll delve into the importance of visuals in game development and prepare for our game concept pitches.

Slide 11: Homework Assignment

- Homework Assignment: Reflect on today's lesson and contribute to your team's game concept refinement. Think about how you can further enhance player engagement through game mechanics.

Day 3: Visuals and Game Concept Development

Slide 1: Title

- Title: Visuals and Game Concept Development

Slide 2: Introduction

- Introduction: Welcome to Day 3 of our Game Development Project! Today, we'll dive into the world of visuals and continue refining our game concepts.

Slide 3: Role Spotlight - Artist

- Role Spotlight - Artist: Artists play a crucial role in the early stages of game development. They are responsible for creating visual representations that capture the initial ideas and aesthetics of the game's characters, environments, and overall world.

Slide 4: Visual Styles

- Visual Styles: Games can have various visual styles, from realistic to cartoonish. The choice of visual style can significantly impact how players perceive and engage with the game.

Slide 5: Concept Art Example

- Concept Art Example: Here's an example of concept art for a game character. Concept artists bring early ideas to life, helping the team visualize and refine the game's look and feel.

Slide 6: Iterative Design Process

- Iterative Design Process: Game development often involves an iterative process. This means creating, testing, gathering feedback, and refining. Artists adapt their work based on feedback to improve visuals continually.

Slide 7: The Pitch

- The Pitch: Today, each team will have a chance to pitch their refined game concept. Effective pitching and communication are essential skills in the industry. You'll have a limited time to present your ideas clearly.

Slide 8: Team Collaboration

- Team Collaboration: Collaboration remains key. Artists should collaborate with designers, programmers, and writers to ensure visuals align with the game's overall vision.

Slide 9: Lesson Objectives

- Lesson Objectives: By the end of today's lesson, you should:
 - Understand the importance of visual style in game development.
 - Comprehend the role of concept artists.
 - Appreciate the iterative design process.
 - Prepare for your team's game concept pitch.

Slide 10: Think, Pair, Share Activity

- Think, Pair, Share Activity: Take a moment to think about the visual style you envision for your game concept. Then, pair up with a classmate and discuss your ideas. Share with the class what you've discussed.

Slide 11: Visual Styles Discussion

- Visual Styles Discussion: Let's have a class discussion about the various visual styles you've considered for your game concepts. Share your thoughts and inspirations.

Slide 12: Role Collaboration Activity

- Role Collaboration Activity: In your teams, discuss how your artists can collaborate with other team members, such as designers, programmers, and writers. Share your insights with the class.

Slide 13: Game Concept Pitch Preparation

- Game Concept Pitch Preparation: Spend some time within your teams preparing for your game concept pitches. Each team will have a limited time to present their refined concept. Be ready to communicate your vision effectively.

Slide 14: Conclusion

- Conclusion: Great work today! You've explored the world of visuals in game development and prepared for your game concept pitches. Tomorrow, you'll have the chance to showcase your creativity and teamwork.

Slide 15: Homework Assignment

- Homework Assignment: Reflect on today's lesson and prepare your team's pitch for tomorrow. Think about how you can clearly present your game concept's visual style and overall vision.

Day 4: Character and World-Building with AI

Slide 1: Title

- Title: Character and World-Building with AI

Slide 2: Introduction

- Introduction: Welcome to Day 4 of our Game Development Project! Today, we'll explore how AI can assist in character and world-building, adding a new dimension to your game concepts.

Slide 3: AI in Game Development

- AI in Game Development: Introduce the concept of Artificial Intelligence (AI) in game development. Explain how AI can be used to automate character and world-building processes.

Slide 4: Classwork - AI Character Generation

- Classwork - AI Character Generation: Provide students with access to AI-driven character generation tools (if available). In teams, have students use these tools to create characters for their game concepts.

Slide 5: Classwork - AI World-Building

- Classwork - AI World-Building: Introduce AI-driven world-building tools (if available) that can generate landscapes, environments, or level designs. In teams, students use these tools to create elements of their game world.

Slide 6: Homework Assignment

- Homework Assignment: Assign homework for students to continue refining their game concepts with the AI-generated characters and world elements. Encourage them to think about how these elements enhance their game's storytelling and player engagement.

Day 5: Game Concept Pitches (Continued)

Slide 1: Title

- Title: Game Concept Pitches (Continued)

Slide 2: Introduction

- Introduction: Welcome to the final day of our Game Development Project! Today, each team will present their refined game concept, including the characters and world elements generated with AI.

Slide 3 to Slide X (varies based on the number of teams)

- Game Concept Pitches: Dedicate a series of slides to each team's presentation, including their game concept, visuals, and AI-generated elements. Limit each presentation to a set time (e.g., 5 minutes) to ensure all teams have a chance to pitch.

Slide Y: Conclusion

- Conclusion: Wrap up the project by congratulating students on their hard work, creativity, and the use of AI in character and world-building. Discuss the potential of AI in the future of game development.

Slide Z: Homework Assignment

- Homework Assignment: Assign homework for students to reflect on the entire project, the use of AI, and what they've learned about game development concepts, team collaboration, and technology integration.
